Administering System Center Configuration Manager Intune Training

Course Overview:

Get expert instruction and hands-on practice configuring and managing clients and devices by using Microsoft System Center v1511 Configuration Manager, Microsoft Intune, and their associated site systems. In this course, you will learn day-to-day management tasks, including how to manage software, client health, hardware and software inventory, applications, and integration with Intune. You also will learn how to optimize System Center Endpoint Protection, manage compliance, and create management queries and reports. Additionally, this course, in conjunction with Microsoft Official Course 20695C, also helps certification candidates prepare for Exam 70-696: Managing Enterprise Devices and Apps.

Course Outline:

1: Managing computers and mobile devices in the enterprise

Lessons

- Overview of systems management by using enterprise-management solutions
- Overview of the Configuration Manager architecture
- Overview of the Configuration Manager administrative tools
- Tools for monitoring and troubleshooting a Configuration Manager site
- Introduction to queries and reports

Lab : Exploring the Configuration Manager tools

- Searching in the Configuration Manager console
- Using Windows PowerShell with Configuration Manager
- Using Configuration Manager Service Manager to manage components
- Monitoring site and component status
- Reviewing log files by using the Configuration Manager Trace tool

Lab : Creating queries, and configuring Reporting Services

- Creating data queries

- Creating subselect queries
- Configuring a Reporting Services point
- Creating a report by using Report Builder

2: Preparing the management infrastructure to support PCs and mobile devices

Lessons

- Configuring site boundaries and boundary groups
- Configuring resource discovery
- Configuring the Exchange Server Connector for mobile-device management
- Configuring user and device collections

Lab : Configuring boundaries and resource discovery

- Configuring boundaries and boundary groups
- Configuring Active Directory discovery methods

Lab : Configuring user and device collections

- Creating a device collection
- Creating a user collection
- Configuring a maintenance window

3: Deploying and managing clients

Lessons

- Overview of the Configuration Manager client
- Deploying the Configuration Manager client
- Configuring and monitoring client status
- Managing client settings in Configuration Manager

Lab : Deploying the Microsoft System Center Configuration Manager client software

- Preparing the site for client Installation

- Deploying the Configuration Manager client software by using client push installation

Lab : Configuring and monitoring client status

- Configuring and monitoring client health status

Lab : Managing Client Settings

- Configuring client settings

4: Managing inventory for PCs and applications

Lessons

- Overview of inventory collection
- Configuring hardware and software inventory
- Managing inventory collection
- Configuring software metering
- Configuring and managing Asset Intelligence

Lab : Configuring and managing inventory collection

- Configuring and managing hardware inventory

Lab : Configuring software metering

- Configuring software metering

Lab : Configuring and managing Asset Intelligence

- Preparing the site for Asset Intelligence
- Configuring Asset Intelligence
- Monitoring license agreements by using Asset Intelligence
- Viewing Asset Intelligence reports

5: Distributing and managing content used for deployments

Lessons

- Preparing the infrastructure for content management

- Distributing and managing content on distribution points

Lab : Distributing and managing content for deployments

- Installing a new distribution point
- Managing content distribution

6: Deploying and managing applications

Lessons

- Overview of application management
- Creating applications
- Deploying applications
- Managing applications
- Deploying virtual applications by using System Center Configuration Manager (optional)
- Deploying and managing Windows Store apps

Lab : Creating and deploying applications

- Installing and configuring the Application Catalog roles
- Creating applications with requirements
- Deploying applications

Lab : Managing application supersedence and removal

- Managing application supersedence
- Uninstalling the Excel Viewer application

Lab : Deploying virtual applications by using Configuration Manager (Optional)

- Configuring support for Microsoft Application Virtualization (App-V)
- Deploying virtual applications

Lab : Using Configuration Manager to deploy Windows Store apps

- Configuring support for sideloading Windows Store apps
- Configuring a Windows Store app
- Deploying Windows 10 apps to users

7: Maintaining software updates for managed PCs

Lessons

- The software updates process
- Preparing a Configuration Manager site for software updates
- Managing software updates
- Configuring automatic deployment rules
- Monitoring and troubleshooting software updates

Lab : Configuring the site for software updates

- Configuring and synchronizing the software-update point

Lab : Deploying and managing software updates

- Determining software-update compliance
- Deploying software updates to clients
- Configuring automatic deployment rules

8: Implementing Endpoint Protection for managed PCs

Lessons

- Overview of Endpoint Protection in Configuration Manager
- Configuring, deploying, and monitoring Endpoint Protection policies

Lab : Implementing Microsoft System Center Endpoint Protection

- Configuring the System Center Endpoint Protection point and client settings
- Configuring and deploying Endpoint Protection policies
- Monitoring Endpoint Protection

9: Managing compliance and secure data access

This module explains how to manage configuration items, baselines, and profiles to assess and configure compliance settings and data access for users and devices.

Lessons

- Overview of compliance settings
- Configuring compliance settings
- Viewing compliance results
- Managing resource and data access

Lab : Managing compliance settings

- Managing configuration items and baselines
- Viewing compliance settings and reports
- Configuring remediation in compliance settings
- Using compliance information to create collections

10: Managing operating-system deployments

Lessons

- An overview of operating-system deployment
- Preparing a site for operating-system deployment
- Deploying an operating-system

Lab : Preparing a site for operating-system deployment

- Managing the site system roles used to support operating-system deployment
- Managing packages to support operating-system deployment

Lab : Deploying operating-system images for bare-metal installations

- Preparing the operating-system image
- Creating a task sequence to deploy an image
- Deploying an image

11: Mobile device management using Configuration Manager and Microsoft Intune

Lessons

- Overview of mobile-device management

- Managing mobile devices with on-premises infrastructure
- Managing mobile devices by using Configuration Manager and Intune
- Managing settings and protecting data on mobile devices
- Deploying applications to mobile devices

Lab : Managing mobile devices with on-premises infrastructure

- Preparing Configuration Manager prerequisites for on-premises mobile-device management
- Enrolling and configuring a Windows Phone 10 mobile device

12: Managing and maintaining a Configuration Manager site

Lessons

- Configuring role-based administration
- Configuring remote tools
- Overview of Configuration Manager site maintenance
- Performing backup and recovery of a Configuration Manager site

Lab : Configuring role-based administration

- Configuring a new scope for Toronto administrators
- Configuring a new administrative user

Lab : Configuring Remote Tools

- Configuring the Remote Tools client settings and permissions
- Managing desktops by using Remote Control

Prerequisites:

- Networking fundamentals
- Principles of Active Directory Domain Services (AD DS)
- Installation, configuration, and troubleshooting of Personal computers supported by Windows

- Public Key Infrastructure (PKI) security concepts
- scripting and Windows PowerShell syntax
- Windows Server roles and services
- Configuration options for mobile device platforms such as Windows, Android, and iOS
- Students can fulfill the requirements for this course by completing the following courses - Course 20697-1, Course 20697-2 and Course 20411.

Who can attend:

- The course is designed for the Professionals working as a Enterprise Desktop Administrators (EDAs)
- The course also suites for the individuals who are interested to appear for the exam 70-696: Managing Enterprise Devices and Apps

Number of Hours: 40hrs

Certifications: 70-696

Key Features:

- One to One Training
- Online Training
- Fastrack & Normal Track
- Resume Modification
- Mock Interviews
- Video Tutorials
- Materials
- Real Time Projects
- Virtual Live Experience
- Preparing for Certification
