Apache Spark and Hadoop

Overview:-

This training course delivers the key concepts and expertise developers need to use Apache Spark to develop high-performance parallel applications. Participants will learn how to use Spark SQL to query structured data and Spark Streaming to perform real-time processing on streaming data from a variety of sources. Developers will also practice writing applications that use core Spark to perform ETL processing and iterative algorithms. The course covers how to work with “big data” stored in a distributed file system, and execute Spark applications on a Hadoop cluster. After taking this course, participants will be prepared to face real-world challenges and build applications to execute faster decisions, better decisions, and interactive analysis, applied to a wide variety of use cases, architectures, and industries.

Course Outline:

1. Introduction

Introduction to Apache Hadoop and the Hadoop Ecosystem

- Apache Hadoop Overview
- Data Processing
- Introduction to the Hands-On Exercises

2. Apache Hadoop File Storage

- Apache Hadoop Cluster Components
- HDFS Architecture
- Using HDFS

3. Distributed Processing on an Apache Hadoop Cluster

- YARN Architecture
- Working With YARN

4. Apache Spark Basics

- What is Apache Spark?
- Starting the Spark Shell
- Using the Spark Shell
- Getting Started with Datasets and DataFrames
- DataFrame Operations

5. Working with DataFrames and Schemas

- Creating DataFrames from Data Sources
- Saving DataFrames to Data Sources
- DataFrame Schemas
- Eager and Lazy Execution

6. Analyzing Data with DataFrame Queries

- Querying DataFrames Using Column Expressions
- Grouping and Aggregation Queries
- Joining DataFrames

7. RDD Overview

- RDD Overview
- RDD Data Sources
- Creating and Saving RDDs
- RDD Operations

8. Transforming Data with RDDs

- Writing and Passing Transformation Functions
- Transformation Execution
- Converting Between RDDs and DataFrames

9. Aggregating Data with Pair RDDs

- Key-Value Pair RDDs
- Map-Reduce
- Other Pair RDD Operations

10. Querying Tables and Views with SQL

- Querying Tables in Spark Using SQL
- Querying Files and Views
- The Catalog API

11. Working with Datasets in Scala

- Datasets and DataFrames
- Creating Datasets
- Loading and Saving Datasets

- Dataset Operations

12. Writing, Configuring, and Running Spark Applications

- Writing a Spark Application
- Building and Running an Application
- Application Deployment Mode
- The Spark Application Web UI
- Configuring Application Properties

13. Spark Distributed Processing

- Review: Apache Spark on a Cluster
- RDD Partitions
- Example: Partitioning in Queries
- Stages and Tasks
- Job Execution Planning
- Example: Catalyst Execution Plan
- Example: RDD Execution Plan

14. Distributed Data Persistence

- DataFrame and Dataset Persistence
- Persistence Storage Levels
- Viewing Persisted RDDs

15. Common Patterns in Spark Data Processing

- Common Apache Spark Use Cases
- Iterative Algorithms in Apache Spark
- Machine Learning
- Example: k-means

16. Introduction to Structured Streaming

- Apache Spark Streaming Overview
- Creating Streaming DataFrames
- Transforming DataFrames
- Executing Streaming Queries

17. Structured Streaming with Apache Kafka

- Overview

- Receiving Kafka Messages
- Sending Kafka Messages

18. Aggregating and Joining Streaming DataFrames

- Streaming Aggregation
- Joining Streaming DataFrames

19. Conclusion

Message Processing with Apache Kafka

- What Is Apache Kafka?
- Apache Kafka Overview
- Scaling Apache Kafka
- Apache Kafka Cluster Architecture
- Apache Kafka Command Line Tools

Prerequisites:-

This course is designed for developers and engineers who have programming experience, but prior knowledge of Spark and Hadoop is not required. Apache Spark examples and hands-on exercises are presented in Scala and Python. The ability to program in one of those languages is required. Basic familiarity with the Linux command line is assumed. Basic knowledge of SQL is helpful.

Number of Hours: 40hrs

Key Features:

- One to One Training
- Online Training
- Fastrack & Normal Track
- Resume Modification
- Mock Interviews
- Video Tutorials
- Materials
- Real Time Projects
- Virtual Live Experience
- Preparing for Certification
